

# CloudSat3 Solar

## Get Started

### MOUNTING

- Mount the CloudSat3 Solar device on the top side (recommended) of the asset/equipment with a clear view of the sky and access to a direct light source.
- Secure the device by installing screws into the four corners of the device and attaching them to your asset/equipment.
- An optional foam barrier with adhesive backing is included for a more secure installation.

# CloudSat3 Solar

## Get Started

### POWERING ON

- Mount the device. Refer to the other side of this card for mounting details.
- Remove the black rubber magnetic tab located on the top of the device opposite of the solar panel. Retain this tab should you ever need to store the device for long periods of time.
- Once the black rubber magnetic tab is removed, the device will transmit a “power on” update within five minutes and initiate the device’s update sequence according to your rate plan.
