

CloudSat3 Solar

Get Started

MOUNTING

- Mount the CloudSat3 Solar device on the top side (recommended) of the asset/equipment with a clear view of the sky and access to a direct light source.
- Secure the device by installing screws into the four corners of the device and attaching them to your asset/equipment.
- An optional foam barrier with adhesive backing is included for a more secure installation.

CloudSat3 Solar

Get Started

POWERING ON

- Mount the device. Refer to the other side of this card for mounting details.
- Remove and retain the black rubber magnetic tab located on the top of the device opposite of the solar panel. **Do not dispose of this tab as it is important for troubleshooting and storage.**
- Once the black rubber magnetic tab is removed, the device will transmit a “power on” update within five minutes and initiate the device’s update sequence according to your rate plan.
